Application Specialties, Inc.

Founded in 1989, Application Specialties, Inc. (*ASI*) has become one of the most trusted metal cutting tool distributors in the Northwest. Our sales staff has a wide range of expertise, allowing us to help you find the right solution when you need it. Because quality is paramount, we stock cutting tools from the **leaders in the industry**. These products range from:

- High Performance Carbide End mills
- HSCO Rough and Finish End Mills
- HSS / HSCO & Carbide Drills
- Carbide Indexable tooling
- Tool holders
- Inspection Equipment
- Work holding
- Cutting Fluids
- Abrasives and more

Technology in our industry is changing rapidly; therefore we maintain a close relationship with each of our manufactures to ensure you have access to the latest and best tool for your application. Supporting our customers to get the most productivity from their tooling investment is a commitment we take seriously. Our staff works on a daily basis with manufacturers representatives on-site to analyze each application and provide you with the data and tooling you need to maximize productivity in your mfg. environment.

In addition to our knowledgeable sales staff, we have a **full service tool and cutter grinding facility**, including balancing and shrink-fit operations all in house. We are involved in the full spectrum of the metal cutting tool industry. From the simple sharpening of an end mill, to the manufacturing of custom form tools, our grind facility can deliver the cutting tools you need quickly - **saving you time and money**.

Two Locations to serve you better:
